Notable features Curves, surfaces and solids modeling On-screen CAD drafting tools Page layout Features of professional drafting software Shapes (design elements) Line: A line is the simplest geometric shape, represented by one line segment. It can be used for 2D drawing and 2D drafting. Arc: An arc is the simplest curved shape and is represented by one or more line segments. It can be used for 2D drawing and 2D drafting. Curve: A curve is the simplest non-planar shape, represented by an infinite sequence of line segments. It can be used for 2D drawing and 2D drafting. Circle: A circle is the simplest closed geometric shape, represented by a circle. It can be used for 2D drawing and 2D drafting. Ellipse: An ellipse is the simplest non-convex geometric shape, represented by an infinite sequence of line segments. It can be used for 2D drawing and 2D drafting. Point: A point is the simplest geometric shape, represented by a dot. It can be used for 2D drawing and 2D drafting. Polyline: A polyline is a sequence of connected line segments. It is commonly used for simple polygonal shapes. A polyline can be used for 2D drawing and 2D drafting. Ribbon: A ribbon is a sequence of connected line segments, typically used for lines, arcs, or filled areas. A ribbon can be used for 2D drawing and 2D drafting. Polyline strip: A polyline strip is a polyline made up of a series of connected line segments, typically used for ribbons or filled areas. A polyline strip can be used for 2D drawing and 2D drafting. Ribbon strip: A ribbon strip is a ribbon made up of a series of connected line segments, typically used for ribbons or filled areas. A ribbon strip can be used for 2D drawing and 2D drafting. Raster image: A raster image is a simple picture, represented by a set of pixels. Raster images are used for graphics, and a subset of raster images are used for animation. Line raster: A line raster is a line segment in a raster image, representing a simple line drawing, typically used for graphics. Arc raster: An arc raster is
